But this isn't the games fault I myself love playing both characters!I don't regret buying the game but contentwise the game doesn't have much to offer.. There's 1 hero, 1 boss, and 1 stage That's it You can either play against the AI or against another player.. There's one level, one hero and one boss so it might get old quickly, especially if you're playing with the same friend over and over

again.. However, there's nothing really fun about it I mean why can't I grab the hero and toss him in the lake? Or grab hero and drown.. Hero character is controlled by another player with the console controller and traditional display screen.. With the boss, the world looks very small You swing your arms wildly about or grab the hero. 34bbb28f04 Windows 7 Loader 1 6 9 By Daz Rar Download
